CAREER OBJECTIVE

Enthusiastic and detail-oriented B.E student specializing in Artificial Intelligence and Machine Learning. Committed to continuous learning, practical implementation, and ethical innovation, with the goal of developing scalable AI solutions that solve real-world challenges.

PROJECTS

CHATBOT DEVELOPMENT PROJECT

- Designed and developed an intelligent chatbot to assist students with academic and general queries.
- Implemented Natural Language Processing (NLP) for understanding user input and generating responses.
- Used Python as the core programming language.
- Tools used: VS Code, Jupyter Notebook.

IOT SMART ROBOT PROJECT

- Designed and built an autonomous IoT-based smart robot for obstacle detection and environmental monitoring.
- Implemented path planning and decision-making logic for autonomous movement.
- Used Arduino / ESP32 as the controller.
- Tools used: Arduino IDE, VS Code, IoT platforms

INTERNSHIP/TRAINING

- Completed structured training in Python fundamentals, including data types, loops, functions, and file handling.
- Developed problem-solving skills through mini projects and coding practice.
- Solved logic-based and real-world problems using Python.
- Used tools such as VS Code and Jupyter Notebook for coding and experimentation.

ACADEMIC ACHIEVEMENTS
